REMARKS

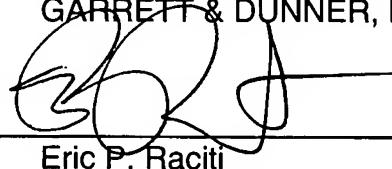

This application has been amended to place all the claims in identical condition as those allowed in parent application USSN 10/136,295, of which this application is a continuation. It is understood by applicants that the claims will be subject to a double patenting rejection by the examiner. However, the claims are being presented to the Examiner, as previously allowed, to permit the Examiner to consider the claims in light of references cited in the EPO Search Report cited in the accompanying Information Disclosure Statement. These references were not considered in the parent case.
